ELSEVIER

Comput. Methods Appl. Mech. Engrg. 132 (1996) 367–368

Computer methods in applied mechanics and engineering

Contents Volume 132

Volume 132, Nos. 1–2, 15 May 1996

Design of Galerkin Generalized Least Squares methods for Timoshenko beams
K. Grosh and P.M. Pinsky 1

Entropy elasticity of isotropic rubber-like solids at finite strains
G.A. Holzapfel and J.C. Simo 17

Large strain analysis of soft biological membranes: Formulation and finite element analysis
G.A. Holzapfel, R. Eberlein, P. Wriggers and H.W. Weizsacker 45

Two scale analysis of heterogeneous elastic-plastic materials with asymptotic homogenization and Voronoi cell finite element model
S. Ghosh, K. Lee and S. Moorthy 63

Distributed-parameter optimization and topology design for non-linear thermoelasticity
C. Jog 117

A priori error estimations of *hp*-finite element approximations for hierarchical models of plate- and shell-like structures
J.R. Cho and J.T. Oden 135

Volume 132, Nos. 3–4, 1 June 1996

Multigrid methods to accelerate convergence of element-by element solution algorithms for viscous incompressible flows
M.P. Reddy and J.N. Reddy 179

A space–time finite element method for structural acoustics in infinite domains. Part 1: Formulation, stability and convergence
L.L. Thompson and P.M. Pinsky 195

A space–time finite element method for structural acoutics in infinite domains. Part 2: Exact time-dependent non-reflecting boundary conditions
L.L. Thompson and P.M. Pinsky 229

Object-orientated finite elements. I: Principles of symbolic derivations and automatic programming
Th. Zimmermann and D. Eyheramendy 259

Object-orientated finite elements. II: A symbolic environment for automatic programming
D. Eyheramendy and Th. Zimmermann 277

Numerical simulation of electrochemical diffusion-migration model with reaction at electrodes
Y.-K. Kwok and C.C.K. Wu 305

Consistent infinitesimal finite-element cell method for diffusion equation in unbounded medium
C. Song and J.P. Wolf 319

Bubble stabilization of finite element methods for the linearized incompressible Navier–Stokes equations
A. Russo 335

A parallel finite element method for the analysis of crystalline solids
N.J. Sørensen and B.S. Andersen 345
